EDUCATION

University of Toronto   Toronto, ON
Honours Bachelor of Science, Major in Computer Science + Minor in Statistics   *Sept 2019 – June 2024*

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, C, Python, Java, HTML/CSS, React, Node.js, Express.js
Developer Tools: Git, Google Analytics, Google Tag Manager, Protocol Buffers, Bash

PROFESSIONAL EXPERIENCE

Google LLC.   Waterloo, ON (Remote)
STEP Intern   *May 2021 – Present*
- Working on full-stack web development project with the Google Workspace Marketplace team
- Due to security reasons, more details will be available after project launch in late August.

Honeybee Hub Inc.   Toronto, ON (Remote)
Software Developer (Part-time)   *Aug 2020 – Jan 2021*
- Redesigned and built researcher client account dashboard using **React.js** and **TypeScript** to improve user experience and client's incentive to use the company's services.
- Collaborated with other developers to integrate payment system into researcher dashboard for monetization.
- Designed and coded a web-page containing pricing information for sponsoring research study posts.
- Pitched and researched for upcoming platform updates involving providing personalized recommendations of research studies to clients using AI (similar to YouTube's or Netflix's recommendation engines).

Software Engineer (Freelancer/Independent Contractor)   *June 2020 – Aug 2020*
- Designed and built (self taught) a customizable, responsive web widget with **JavaScript** and **Webpack** on the front-end to be embedded onto third party websites; directing people to select research studies featured on the company's website.
- Prototyped information tracking pixel for the widget on the back-end with **Node.js**, **Google Analytics**, and **Google Tag Manager**
- Built final information tracking pixel for the widget with **Node.js**, and **G Suite APIs** on the back-end.
- Managed clear communication with supervisors, researched and recommended best practices for software design, and completed the project on time with excellent independence leading to return offer for full-time or part-time.

PROJECTS

Responsive React Website: utcg.club/ | *Personal Project (Team, Lead)*   *Oct 2019 - May 2020*
- Built and designed **React** components for the club website after learning **React** in less than 2 weeks.
- Spearheaded the front-end development and design of the project, taught the code base to teammates and led front-end development as a result.

Statistical Analysis of Crime in Toronto Neighbourhoods | *School Project (Team)*   *Nov 2020 - Dec 2020*
- Visualized and predicted auto theft crime in Toronto neighbourhoods using the **R programming language**.

LEADERSHIP EXTRACURRICULARS

Projects Chair | *University of Toronto Computer Graphics Club (UTCG)*   Oct 2019 – Present
- Worked with companies, recruiters, professors and students over different time zones to organize job fairs, workshops and other club activities.
- Created a program for students to learn about and develop Computer Graphics projects for their resumes despite the difficulties of quarantine.
